FOR LEADERS MANAGING AI-ENABLED WORK

You don't have to *build* the AI. Know what you're *putting to work.*

Expert in your field. Now responsible for AI in the work. For leaders, managers and experienced professionals using AI, evaluating suppliers or overseeing work across teams and systems.

FOUR LIVE SESSIONS | ONE CASE | THREE TOOLS TO KEEP

WHAT YOU WILL TAKE AWAY

Use it. Choose it. Oversee it.

01

Use it.

A repeatable way to check AI-assisted work: review information, assess output and establish human verification.

AI Use Review

02

Choose it.

A structured basis for a supplier decision: compare evidence, benefits, full costs and operating requirements.

AI Value & Fit Review

03

Oversee it.

Clear responsibilities across the process: approvals, handoffs, exceptions and review triggers.

AI Workflow Oversight Map

Work on one case. Receive all three practical Working With AI guides with AI-ready instructions for employer-approved tools. No coding or confidential company information required.

Applications: infrastructure, utilities & transport · energy & mining · finance, insurance & investments · manufacturing.

Go back to work with *something useful.*

Four weekly live sessions: 60-minute core + optional 30-minute Q&A. Week 4 is the Case Clinic. Choose and refine a work situation with confidential and identifying details removed or instructor-provided case in Session 1.

01

Define the job.

What result matters? Is an assistant, agent, workflow—or no AI—the right approach?

02

Set the resources and limits.

Information, access, boundaries, cost and necessary approvals.

03

Know what to check.

Performance, evidence, failures and when to intervene.

04

Bring your case.

Rehearse your recommendation. Receive direct instructor and peer feedback.

WHAT YOU ACTUALLY GAIN

Be ready for the next decision.

Bring a real dilemma. Test the evidence. Practise what you would recommend—and what you would not approve yet.

Included: The cohort includes one individual instructor review of your submitted case, with practical feedback. Live challenge and cross-industry perspectives. Educational scope; not company consulting. **Leave with:** a clearer next step and three reusable tools.

THE AUDITOR'S LENS

Good questions hold up when the stakes rise.

01 / Purpose and improvement

02 / Value, total cost and remaining risk

03 / Responsibility and approvals

04 / Evidence under real conditions

05 / Exceptions and escalation

06 / Performance, cost and risk review

DESIGNED & DELIVERED BY

Ludmila Pirogova

ISO/IEC 42001 Lead Auditor · CPA/CMA. Enterprise systems across business, technology and capital-intensive operations. Asset cases draw on ISO 55000; financial cases connect value, cost, evidence and accountability.

Certificate of Applied Practice issued by AI Trust by Design, a professional education program of NXTFrontier Group. Earn it by presenting a case demonstrating the course method and completing the end-of-course quiz. Not an ISO certification, independently accredited credential, IAM qualification or professional licence.

NEXT PUBLIC COHORT

Work on a case that matters.

Planned start: January 2027. Dates and session times to be confirmed.

CAD 995 / USD 895 per participant, plus applicable tax. No payment required to express interest. Team delivery and company invoicing by arrangement.

Get ready to manage AI without building it.

Express interest or explore team enrollment.
